PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 5+ years of experience engineering high-scale, multi-tenant ERP and SaaS platforms. Core contributor to Symfony (25+ merged PRs) and contributor to Google's official PHP API client. Proven track record architecting high-throughput API layers (~10M requests/month), authoring public developer SDKs, optimizing MySQL query performance, and leading production reliability workflows using PHP 8, Symfony, React, TypeScript, MySQL, Redis, AWS, and Docker.

TECHNICAL SKILLS

- **Backend & APIs:** PHP 8/7, Symfony (MVC), RESTful API Design, GraphQL, OpenAPI / Swagger, FastAPI, Python, Redis
- **Frontend:** TypeScript, JavaScript, React, Tailwind CSS, SVG Data Visualization, HTML5/CSS3
- **Cloud, DevOps & Databases:** MySQL (Indexing, Query Optimization), AWS (EC2, S3, RDS, CloudWatch, WAF), Docker, CI/CD (GitHub Actions), Ansible
- **Architecture & Practices:** Domain-Driven Design (DDD), SOLID, Multi-Tenant Architecture, Microservices, SDK Design, Root-Cause Analysis (RCA), Code Review
- **Testing & Observability:** PHPUnit, Jest, TDD, Static Analysis (PHPStan), Sentry (Observability), Git, GitHub, Jira, Zendesk, AI-Assisted Workflows

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Qbil Software (Remote, Netherlands) **Jul 2021 – Present**

Qbil-Trade: Multi-tenant commodity trading & logistics ERP (PHP 8, Symfony, GraphQL, REST, React, MySQL, Redis, AWS, Docker)

- Architect and maintain the core API ecosystem (GraphQL + REST, **~10M requests/month**) for **40 enterprise tenants** from a unified codebase, ensuring strict data isolation, zero-fork customizability, and 99.9% uptime.
- Engineered and shipped the public Qbil PHP SDK (PHP 8.1+, Stainless-generated) and developer documentation (**developers.qbiltrade.com**), providing typed, named-parameter integration with structured exception handling.
- Modeled complex trade lifecycle domains (contracts, logistics, invoicing, inventory) leveraging **Domain-Driven Design (DDD)** and **SOLID** principles, shipping cross-stack features on 2-week release cadences.
- Raised regression test coverage to **~70%** introducing TDD workflows with **PHPUnit**, adversarial PR reviews, and AI-assisted test suite generation against real network and persistence states.
- Spearheaded production incident management across **Sentry, Jira, and Zendesk**; conducted root-cause analyses (RCA) on critical issues and cut recurring release-related defects.
- Containerized application stack with **Docker**; maintained AWS cloud workloads and automated CI/CD deployment pipelines with AWS WAF security filtering and Sentry performance tracing.
- Mentored 4+ engineers through code reviews, establishing team guidelines for feature branching, atomic commits, Jira-linked pull requests, and automated testing.

Full Stack Developer | ICloudEMS (India) **Apr 2021 – Jul 2021**

Student-Centric Higher-Education ERP

- Built and shipped backend REST APIs (PHP/MySQL) and responsive React UI components for university clients; configured Linux cloud servers and automated staging deployments.

OPEN SOURCE CONTRIBUTIONS & TECHNICAL PROJECTS

- **Google API PHP Client** (googleapis/google-api-php-client – 9.8k stars): Diagnosed and merged fix in v2.20.1 matching batch response parts by Content-ID instead of position, preventing response decoding errors into mismatched model classes (PR #2726).
- **Symfony Core Contributor** (symfony/symfony – 25+ merged PRs): Active contributor to Symfony TUI components; fixed rendering bottlenecks, input sanitization, timer-drift, and multi-byte Unicode/emoji width calculations with full PHPUnit regression tests.
- **NativePHP for Symfony** (Author & Maintainer | Packagist): Ported Electron desktop and mobile runtimes to Symfony with 1,170+ automated tests; published on Packagist with 11 upstream patches (4 merged).
- **Live Markets Dashboard & Security Tools:** Engineered real-time financial analytics dashboard (SVG charting, public FX/crypto APIs) and a k-anonymity password checker service with FastAPI and OpenAPI documentation.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science & Engineering • Sharda University 2017 – 2021

Executive Certification in DevOps Engineering • IIT Roorkee / Intellipaat 2021
